

To whomsoever it may concern

Subject: JSW MAKING FACILITIES AT VIJAYANAGAR PLANT

This is to advise and confirm that JSW Steel Ltd., Vijayanagar Works produces COLD ROLLED COILS using HOT ROLLED COILS from SLABS which are produced from an integrated Blast Furnace and Corex plant with Basic Oxygen furnace Steelmaking and Continuous Slab Casting processes.

The total Scrap charge component is 12% max (DRI included), all of which are pre-consumer scrap (generated during steel making and rolling processes) and no post-consumer scrap is being used.

For JSW Steel Limited

Mr.G V Ramana
Deputy General Manager
Product Design & Quality Control (PDQC)
